Flora Northwest - <http://science.halleyhosting.com>

List compiled by Paul Slichter, David Biek & Susan McDougall.

The DNR quarry is a unique site that is perhaps the highest (4100') oak grove on a bald in Washington State, and thus houses a flora somewhat unique to Mt. Adams. It is reached by driving north of Glenwood on the Mt. Adams Highway. Turn west and uphill onto road K6000, eventually crossing the Hellroaring Ditch (irrigation) and proceeding straight uphill perhaps another mile to K6900 on the right. The quarry is at the end of K6900 along the southern border of Yakama lands.
